

BIMRAD Magazine "PAAL"

(ISSN 2959-5444)
Volume 7, Issue 3, 2024

Theme: The Future of Blue Carbon Resources

CALL FOR ARTICLES

BIMRAD is delighted to extend a warm invitation to the students, researchers, academicians, and maritime experts to share innovative and analytical insights to publish in BIMRAD Magazine "PAAL." This is a double blind peer reviewed magazine. This time "*The Future of Blue Carbon Resources*" has been selected as the theme of the magazine.

Blue carbon simply represents carbon, captured by the world's ocean and coastal ecosystems. Major blue carbon resources include mangroves, seagrasses, and salt marshes. By absorbing and storing carbon for long periods, they help reduce greenhouse gases from the atmosphere and mitigate climate change. Since these ecosystems are being degraded by natural calamities and human interaction, protecting and restoring these ecosystems has become crucial to address global warming, while also supporting biodiversity and coastal resilience. Additionally, by incorporating these carbon-rich ecosystems into global carbon market, significant economic benefits can be achieved alongside environmental sustainability.

Submission Guidelines:

- The write-up must be relevant to the theme of the magazine.
- Manuscripts should be original and not under consideration for publication elsewhere.
- The write-up should be within 1200-1500 words.
- Authors name, designation and email must be mentioned at the end of the write-up.
- Submissions should be sent electronically to paal@bimradbd.org by 10 November, 2024.
- The images used in the articles must be sent in a separate word document.
- The source of the images must be mentioned.
- Manuscript must be "spell checked" and "grammar checked."
- Write-up should be in MS Word file (.docx), Font: Arial, and Size: 12.
- Similarity index and AI to be kept as minimum as possible (not more than 20%).
- Please, use APA (7th edition) referencing style with in-text citation.
- You can add a good resolution relevant picture to the article.

Authors contribution will greatly enhance the scholarly discourse within the maritime community and contribute to the advancement of the national prosperity.
